Dr. Altman was approached by exasperated Manly voters and asked to be a candidate in the election next Saturday. He agreed to run out of concern for the community. He is one of Australia's top experts on clinical trials and drug regulation and for over 40 years he consulted for most of the pharmaceutical companies and dealt with the Australian Therapeutic Goods Administration (TGA) to obtain final approval to market new drugs. He is raising the alarm because the Covid "vaccines" have not been found to be safe nor are they effective as claimed. They are associated with the highest incidence of serious adverse events and death of any drug ever released. These so-called "vaccines" should be suspended from use. At the forum he will present the proof behind this view and other information of vital interest to voters in the Manly seat (which runs from Seaforth to Dee Why) and across NSW.

VOTE **1**

**Doctor Altman to Save
lives and Fix the state**

"It is now clear our government and health officials have provided misleading information regarding the COVID vaccines. They are not "safe" as claimed nor are they effective as claimed. I am a pharmacologist and drug development expert and I can provide all the data to prove this to you."

See www.phillipaltman.com.au. These jobs have been associated with more serious adverse reactions and deaths than any drug in the history of the pharmaceutical industry since their Provisional release.

ETERNAL VIGILANCE IS THE PRICE OF FREEDOM

The chart shows excess deaths (blue line) ie the number of deaths from any cause which occur from year to year above or below that normally expected. The base line (at 0%) represents the normal number of deaths expected. You will see that **since the Covid jabs were rolled out in Australia the excess deaths have skyrocketed**. Most of these have no explanation other than the jab. This is a massive crisis and is occurring to a similar degree worldwide. Medical professionals have been barred from speaking to patients about this and as a result many in our community have died needlessly.

Professor Gigi Foster of UNSW found that the costs of the response to the Covid crisis were more than 60 times the benefits. Lives have been devastated and lost. This crisis points to serious failures in both management and governance in NSW. Please come to the forum to hear the facts behind this alarming situation and other topics of vital interest to voters. It is very important that voters be fully informed before voting at the 25 March election.

You get the government you earn.
Please make the effort to become properly informed in order to help save lives and fix the State
